People, Capabilities and Systems to Save Money and Increase Productivity

Company Profile

We're the largest and most successful company in our field because we continually satisfy our customers with the world's best lubrication and pumping systems. For more than 90 years, companies have relied on our technical and quality leadership, our world-class manufacturing and customer service and our vast network of distributors and support facilities. Lincoln develops new products and systems at research and development facilities in the U.S., Germany and India that provide global and regional application solutions.

Manufacturing

Lincoln builds precision lubrication equipment and components, state-of-the-art electronic controls and the industry's top-performing pumping stations. Collaboration between our U.S. and German engineers ensures our products are designed to be manufactured to Lincoln's highest quality standards in one of our worldwide facilities.

Worldwide Services

With five technical support centers on three continents, and a global network of systems houses and distributors supported by regional sales and service offices, our customers can always draw on our worldwide resources.

Proven Lincoln Quality and Performance

Lincoln's new PMV family of grease and oil pumps represents more than 90 years of high-quality engineering, technology and manufacturing. The unique, modular design of these pumps includes precision-machined parts made with durable materials which allows for a longer pump life.

Based on Lincoln's proven PowerMaster III air logic pump technology, PMV is a simple design with few moving parts. This translates to exceptional performance, long service life and low maintenance cost.

"I like everything about the new PMV pump. I like the size, I like the sound and I like the performance."
