

7.0 Controls

Control and monitoring (alarms)

A distinction is made here between different levels of control comfort.

Simple control has no display and only offers standard control functions.

Comfortable control and monitoring works with compatible modules and therefore permits various levels of operating comfort.

All system modules can be integrated into a network, i.e. the alarm message from the basic container then also appears on the display of the ink level control at the press desk. All displays are designed as touch screens and thus allow a very high level of operating comfort. Interfaces to in-house networks are prepared and can be integrated at any time.

The visualisation of the tank systems is also realised via a colour touch screen. All relevant information is displayed in a well-organised and easily identifiable way at the central control cabinet. In principle, any customer wish can be implemented in such a control.

7.0 Controls

Model	Type	Description	Part number
LICC4	Level control for 4 containers	Electronic inst. for monitoring 4 containers	A765.73.85/2
LICC8	Level control for 8 containers	Electronic inst. for monitoring 2 x 4 containers	A765.73.94
LIVM1	Consumpt. control for 4 colours	Electronic inst. for liquids consumpt. measurement with 1 display	A765.73.89
LIVM2	Consumpt. control for 4 colours	Electronic inst. for liquids consumpt. measurement with 2 displays	A765.73.90
	Complete inst.	On request	By order
