Mityvac model MVA6851 Fluid Extractor

Mityvac model MVA6851 Fluid Extractor operates using a simple syringe action to quickly and cleanly extract or dispense fluids into or out of small reservoirs.

With up to 7 oz. (200 cc) fluid capacity, it is ideal for removing used fluids from master cylinders, transaxles, power steering or coolant reservoirs prior to bleeding, fluid changes or repairs. The extractor is lightweight and easy to clean. It features a 7½ in. (190 mm) long, flexible tube for accessing reservoirs and includes a non-drip cap.

- Simple, syringe-type action extracts or dispenses fluid quickly and cleanly
- Compact, streamlined design allows access into tight spaces
- Ideal for evacuating or topping-off master cylinders and other small reservoirs
- Easy to clean - hose and seals are simple to replace

Model MVA6851 is available for immediate order and shipment by October 1. Go to Mityvac.com for additional information and to download images.
