

85307 lubrication controller

Upgraded design features digital display for quick identification of system status

The SKF 85307 lubrication controller provides confidence that machinery is receiving proper lubrication. Equipped with both visual and audible fault notifications, the unit's three-digit LED displays easy-to-identify codes so that lubrication system issues can be addressed quickly and efficiently.

Compatible with single-line, dual-line and progressive lubrication systems, the lubrication controller has a durable, compact housing with a small footprint. Also, it is simple to install because the wiring harness attaches directly into the controller.

The lubrication controller is suitable for agricultural, off-road, mobile construction equipment, and general industry applications.

SKF 85307 lubrication controller advantages:

- Easy-to-identify error codes
- Visual and audible fault notification
- Small footprint; fits in any cab
- Simple to install
- Monitors reservoir level
- Counts lubrication cycles
- Operating temperature range of -15 to $+50$ °C (5 to 122 °F)
- Offers 12-volt or 24-volt operation
- Timing intervals from five seconds to 24 hours
- Suitable for use with single-line, dual-line and progressive systems

Provides confidence that equipment is properly lubricated

Available models

Order no.	Description
85307	Lubrication controller
279630	Wiring harness

85307 lubrication controller
